

CNETMOS – Cloud Network Monitoring

Pacific Tech’s CNETMOS is a Value-Added-Service (VAS) which provides monitoring and alerting service of your critical network devices. This service is offered to network firewalls from Fortinet and Sophos.

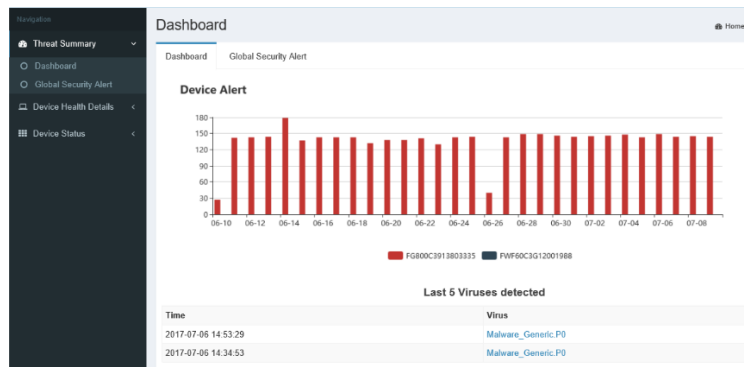

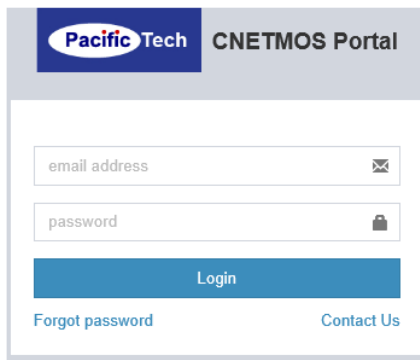

Benefits:

- ❖ Get Alerts for problems and potential problems that could interrupt WAN connectivity.
- ❖ Insights in internet usage trending and make better capacity
- ❖ Understand your network threat landscape
- ❖ Centralized portal to view all your device health status

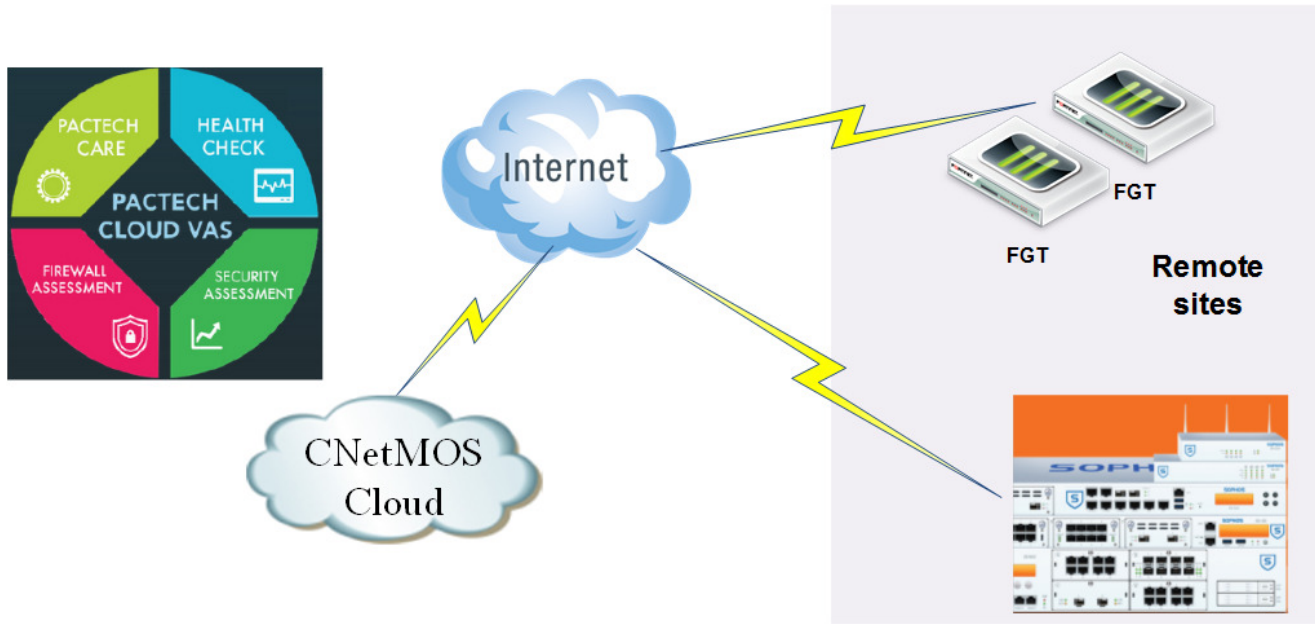

Service Features

- ❖ **Receives email alert for device health**
 - High CPU
 - High Memory
 - High WAN link utilization
 - WAN link failure
- ❖ **Portal access to**
 - View Malware trend
 - View Intrusion Attack trend
 - View Device Alert trend
 - View Device Health Status
 - View Global Alert
 - View CNETMOS Threat briefing

CNETMOS – Cloud service architecture

SNMP Poll

CNETMOS Cloud Manager polls each monitored device via SNMP protocol every 5 minutes. For security reason, each monitored device is configured to only accept SNMP poll from the Cloud Manager IP Address.

CNETMOS Cloud Manager polls each monitored device for:

- CPU utilization
- Memory Utilization
- WAN port utilization
- WAN Port link status

CNETMOS Cloud Manager as SNMP trap receiver to receive traps from monitored devices.

CNETMOS Action

CNETMOS triggers and email alert to subscriber’s IT Admin when the monitored device’s CPU, Memory, WAN port utilization exceeds threshold or when it’s monitored WAN port goes ‘down’.
